Subject: Raised Bill No. 213

Please pass this bill as it is proposed. The State of Connecticut has already let our family down in the lack of prosecution of our Sister Heather's killer with the killer being acquitted of charges due to his "incurable mental defect" (that the brilliant psychiatrist's at CVH managed to cure). Unfortunately there is nothing we can do about that but for any other family in Connecticut in the future that might go through the same hell we live with each and every day, the least that you can do is protect the victim's estates from allowing the killer to profit from his deed like David Messenger did in the murder of Heather. Just typing this brings back so much emotion regarding this injustice in Connecticut that I'll sign off now before I say anything more.

Sincerely,
Gordon C. Williamson
